

FEATURES

- Mix and Match 3B Series I/O Module Capability**
- Factory Mutual (FM) Approved**
- CE Certified**
- ±1500 V peak Channel/Channel and Input/Output Isolation**
- 25°C to +85°C Temperature Range**
- LEDs indicate when power is applied**
- Replaceable AC Line Fuse in Protective Housing**
- Versatile Mounting Options**

APPLICATIONS

- Industrial Signal Conditioning**
- Industrial Signal Isolation**
- Industrial Signal Filtering**

PRODUCT OVERVIEW

To address diverse applications, the 3B Subsystem Series includes a family of backplanes which provide a complete signal conditioning solution. The 3B01 backplane is designed for 16 channels, to offer users the flexibility to match the size of a system to specific applications. All backplanes are provided with #6-32 x 1-inch screws and standoffs for mounting. Several mounting options are available, including rack, surface and NEMA enclosure.

All 3B Series modules feature a universal pin out and can be easily tailored to fit the user's application. Each backplane can accommodate any 3B Series module in a "Mix and Match" arrangement.

Modules are "Hot Swappable"; power does not have to be removed when inserting or removing any module on the backplane.

All backplanes provide a four screw terminal for each individual channel's input field connections. These connections satisfy all transducer inputs and provide transducer excitation when necessary.

Figure 1 3B01 Functional Block Diagram

A cold junction temperature sensor is also supplied on each channel to accommodate thermocouple input modules.

Each channel has two screw terminals for the output connections for the 4-20 mA output signals. Two 26-pin system connectors provide high level voltage I/O for all channels.

Figure 1 illustrates the 3B Series backplane functional block diagram. In addition, complete specifications are shown in the table below.

GENERAL DESCRIPTION

The 3B01 Series backplane provides the user with sixteen Channels, any of which may be used with any of the 3B series of modules offered by ADI.

This backplane have been designed to operate in a wide temperature range, from -25°C up to +85°C

The 3B01 Series backplane has been evaluated by both Factory Mutual and also by CSA. The 3B01 has passed all agency testing and is listed by both organizations. In addition the 3B01 series back plane is also CE certified.

The 3B01 backplane has several mounting options:

- Surface Mount – stand alone or using Surface Mount Kit, model AC1331
- 19-inch Rack Mount Kit model AC1330

3B01 Specifications

(typical @ +25°C and ±15 V dc, and +24 V dc Power)

Description	Model 3B01
Number of Channels	16
ISOLATION	
Input-to-Output Continuous	1500 V rms, Maximum
Channel-to-Channel Continuous	1500 V rms, Maximum
MECHANICAL DIMENSIONS - with modules	
	17.4" x 5.2" x 4.373" (441.96 mm x 132.08 mm x 111.07 mm)
Mounting Standoffs	7
COLD JUNCTION TEMPERATURE SENSORS	
Number provided on backplane	16
Initial Accuracy @ +25°C	±0.5°C
Accuracy +5°C to +45°C	±0.5°C (+0.0125°C/°C)
SYSTEM I/O CONNECTOR	
Number	2, 26-pin
Type	Amp 746290-6
POWER SUPPLY OPTIONS	
Voltage; AC Power Supply	115 VAC
Voltage; DC Power Supply	+25 VAC
Voltage; External Supplies	±15 VDC and +24 VDC
Fuse; AC Power Supply	220 VAC @ 500 mA
POWER INDICATOR	LED's indicate ±15 VDC and + 24 VDC Power Applied
Environmental	
Temperature Range	
Rated Performance	-25°C to +85°C
Operating	-25°C to +85°C
Storage	-40°C to +85°C
Relative Humidity, 24 hours	0 to 95% @ +60°C noncondensing

NOTES

NOTES

All 3B modules

In the Models Available section (page 3) under the Output Ranges column, change the 0mA to 20mA to indicate **4mA to 20mA**. Also change **NOTE 1** in this section 4mA to 20mA to indicate **0mA to 20mA**.
